

Certified Production Technician (CPT) Program

The CPT program with skill boss is designed to prepare employees with the next generation of skills to work in a computer-driven, data-intensive advanced manufacturing workplace.

The course combines online learning and simulation with hands-on demonstration of skills, supervised by one of our skilled and experienced instructors.

Course topics include:

- Safety—35 hours
- Quality Practices and Measurement
- Manufacturing Processes and Production
- Maintenance Awareness

Attending the course has these benefits:

- Allows documentation of 55+ hands-on skills from the Manufacturing Skill Standards Council (MSSC) national standards
- Increases employer and worker confidence by requiring evidence of hands-on skills
- Interactive with CPT virtual 3-D learning environment
- Offers workers a robust introduction to Mechatronics
- Appeals to tactile learners through dynamic learning experience
- Eligible to sit for MSSC certification exams to become a certified production technician

Introductory cost of course is \$1,500.
Limited scholarships may be available.
